

Canary Wings Begonia Vegetative

Canary Wings offers a unique look on a plant that has become a staple in gardens around the world! Canary Wings has bright foliage that changes from yellow to bright chartreuse throughout the season on a plant that continues to perform all Summer long. A great option for shade/early morning sun baskets. Good for small pots and large containers in a combo.

General Information

Height:	Spread:	Exposure:
12 - 18" (30 - 46cm)	15 - 18" (38 - 46cm)	Shade

Propagation Guide

Tray Sizes (cells/tray):	Average Days with Mist:	Average Propagation Time (weeks):
Liner 72-128	7	6-7

Comments:

When rooting, mist for first week then allow feet to dry out to form roots. If misting constantly, rooting will take much longer.

Finishing

Soil pH:	Light Levels (fc):	Temperature Day:	Temperature Night:	Fertilization (ppm N):	Pests:	Diseases:
5.4-6.2	3,000-7,000	65-70°F (18-21°C)	60-65°F (16-18°C)	150-200 ppm	Not regularly seen	Not regularly seen

Crop Time (weeks)

4- to 5-inch (10- to 13-cm) Pots, Quarts :	6-inch (15-cm) Pots, Gallons:	10- to 12-inch (25- to 30-cm) Tubs or Baskets:
6-8 weeks from transplant	7-9 weeks from transplant	10-12 weeks from transplant
