Cannova® Rose Canna

Cannova is the first seed F1 canna series that offers an easy-to-grow option in this heat-tolerant class. Improved young plant performance provides more useable plugs that are uniform and earlier than other seed canna programs. Plus, the strong color selection captivates the landscape market. Cannova is a versatile series that works well in 4-in. (10-cm) pots to 2 gallons and is ideal for cart programs. Supplied as virus-free seed and plugs.

Cannova Rose offers a deep, saturated color which is great in the landscape!

Comments:

Avoid overhead watering during finishing process. Overhead watering increases the risk of bacterial infection. All Cannas are susceptible to virus – most commonly "Canna Yellow Mottle Virus." If this happens, affected plants and surrounding plants should be rouged and the area disinfected.
