

## Coral Orange Sunrise Vining Dipladenia

This is part of the Diamantina™ Collection of varieties bred by mandevilla and dipladenia expert Lannes of France. These sun-loving vining varieties are earlier to bloom, plus they have increased branching and blooming capacity versus current market competitors. The series offers extreme heat, drought and bad weather resistance. Great alone or mixed with other sun-loving varieties in patio or garden containers with a support (like a trellis). Requires hand-training to a trellis. They are programmable for a wide range of sizes in trellised production to fit any tropical lover's space!

In a class by itself! This orange bloom color is the only one of its kind on the market in mandevilla/dipladenia. Winner of the IPM Essen 2016 Innovation Award.

### General Information

Height:	Spread:	Exposure:
12 - 60" (30 - 152cm)	12 - 16" (30 - 41cm)	Sun

### Propagation Guide

Tray Sizes (cells/tray):	Rooting Hormone:	Average Days with Mist:	Pinch:	Average Propagation Time (weeks):
72	Yes	14	No	10

#### Comments:

Rooting hormone is not required. Cuttings come in treated with transparent product.

### Finishing

Soil pH:	Light Levels (fc):	Temperature Day:	Temperature Night:	Fertilization (ppm N):
5.3-5.6	3,716	70-75°F (21-24°C)	59°F (15°C)	5.14.36 with 1.2 EC

#### No. of Pinches:

2, First Pinch: 3-4 weeks after the liner transplant (Remain 6 leaves below the pinch)

#### Plant Growth Regulators (S) = spray / (D) = drench:

Daminozide 85% (S) or Propiconazol 10% (S)

#### Pests:

Aphids (during early Spring) or Spider mites (during very dry weather)

#### Diseases:

Fusarium, Pythium

#### Comments:

It is important to manage the temperature following the light intensity. It is essential to choose the right substrate. Will require some hand-training to start it to vine onto a support.

### Crop Time (weeks)

4- to 5-inch (10- to 13-cm) Pots, Quarts :	6-inch (15-cm) Pots, Gallons:	10- to 12-inch (25- to 30-cm) Tubs or Baskets:
6 to 7 months	7 to 8 months	8 to 9 months
