

## Jupiter White Exacum

Vegetative series for quick turns and reliable production. These tidy, long-lasting plants hold up through shipping. Plus, this series does not require pinching or PGRs for ease of growing. Jupiter will arrive at retail in great condition while also providing an outstanding shelf life. The fun, double blooms make for a great impulse buy! Thrives as an indoor potted plant or outdoors in a protected, shaded area.

### General Information

|                    |                    |            |
|--------------------|--------------------|------------|
| Height:            | Spread:            | Exposure:  |
| 4 - 6" (10 - 15cm) | 7 - 8" (18 - 20cm) | Shade, Sun |

### Propagation Guide

|                          |                  |                         |               |                                   |
|--------------------------|------------------|-------------------------|---------------|-----------------------------------|
| Tray Sizes (cells/tray): | Rooting Hormone: | Average Days with Mist: | Pinch:        | Average Propagation Time (weeks): |
| 30mm                     | None required    | 5 days                  | None required | 3-4 weeks                         |

**Comments:**

This item is very easy to grow, blooms and buds will not affect the rooting of this liner or the growth of the plant.

### Finishing

|          |                    |                   |                    |                          |                 |
|----------|--------------------|-------------------|--------------------|--------------------------|-----------------|
| Soil pH: | Light Levels (fc): | Temperature Day:  | Temperature Night: | Fertilization (ppm N):   | No. of Pinches: |
| 5.2-5.6  | 1,000-2,500        | 70-75°F (21-24°C) | 66-70°F (19-21°C)  | 225-300 ppm N/1.5-2.0 EC | none            |

|   |                            |                                    |
|---|----------------------------|------------------------------------|
| Plant Growth Regulators (S) = spray / (D) = drench: | Pests:                     | Diseases:                          |
| none  | Spider mites are very rare | Botrytis caused by low night temps |

**Comments:**

Irrigation from below is recommended. Space when plants begin to touch. Grow on the "dry side" for better compact habit. Humidity must not exceed 80%, to reduce risk of fungal disease.

### Crop Time (weeks)

|  |                               |  |
|--|-------------------------------|--|
| 4- to 5-inch (10- to 13-cm) Pots, Quarts : | 6-inch (15-cm) Pots, Gallons: | 10- to 12-inch (25- to 30-cm) Tubs or Baskets: |
| 12 weeks                                   | 14 weeks                      | Not recommended                                |

NOTE: Growers should use the information presented here as guidelines only. Ball Ingenuity recommends that growers conduct a trial of products under their own conditions. Crop times will vary depending on the climate, location, time of year, and greenhouse environmental conditions. It is the responsibility of the grower to read and follow all the current label directions relating to the products. Nothing herein shall be deemed a warranty or guaranty by Ball Ingenuity of any products listed herein. Ball Ingenuity's terms and conditions of sale shall apply to all products listed herein.
