

Julietta Blue Lisianthus

Crop time: 8 to 16 weeks

More compact and flowers one week earlier than current commercial pot lisianthus for more crops in the greenhouse and a longer selling window. The double flowers don't just offer extra beauty; this novelty also scores well in terms of lifespan.

General Information

Height:	Spread:	Exposure:
6 - 10" (15 - 25cm)	8 - 10" (20 - 25cm)	Partial Sun, Sun

Germination Guide

Plug Size:	Cover Seed:	Germination Temp:	Days to germinate:	Plug Crop weeks:
288	No	59-68°F (15-20°C)	20-25; light required for germination.	8-10

Finishing

Soil pH:	Temperature Day:	Temperature Night:	No. of Pinches:
6.5-7.2	68-75°F (20-24°C)	55-60°F (13-16°C)	None needed, as plants are naturally dwarf.

Plant Growth Regulators (S) = spray / (D) = drench:

10 days before shipment, spray one application of 300-350 ppm of B-Nine to the top.

Comments:

Transplant into final container when at least 2-3 pairs of true leaves are open; transplant when conditions will not stress the roots (early morning when it's cooler and less sun). Stress will result in poor growth and may also cause rosetting; do not allow plugs to become rootbound.

Crop Time (weeks)

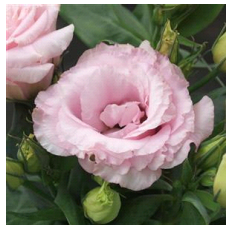

4- to 5-inch (10- to 13-cm) Pots, Quarts :
12-16 weeks
